

What is a Sungrow solar inverter?

A Sungrow solar inverter is a brand that has a significant market share in over 60 countries worldwide. In India, Sungrow Power has installed over 4 GW of inverter capacity, making it one of the largest players in the market.

Who manufactures Sungrow inverters?

Sungrow, founded in 1997, is the leading inverter manufacturer in the world with over 87 GW of inverter power installed worldwide. They are a leading manufacturer of project inverters in Europe. (Note: Approval for VDE-AR-N 4105 is not available, only for VDE-AR-N 4110/4120. For 800 V mains connection)

What is a good voltage range for a Sungrow inverter?

It is worth noting the rates included on the data sheet are the European weighted efficiency rates. The inverters' 16 A input current and 25 A short circuit current should satisfy most residential installations while the start-up and MPPT voltage range (180 V - 1000 V) is notable with Sungrow indicating it will translate to higher system yield.
