

Where can I find information about Sungrow Power Inverter?

You may get additional information at This manual is for technical personnel who are responsible for inverter installation,operation and maintenance,and the inverter owner who will perform daily APP operation. Read the manual and other related documents before commencing any work on the inverter.

Can a Sungrow inverter be touched during Operation?

Only the DC/AC switchcan be touched during operation. Operate the inverter by strictly following the descriptions in this manual to avoid unnecessary personal injury and property damage. Arc flash,fire or explosion may occur if done otherwise and SUNGROW will hold no liability for damages.

How to enable live data function of Sungrow inverter?

The first time you fill in the end user's e-mail address,the system will create an account for the end user and send an email to the end user. The end user can activate the account via the email. Tab the inverter to view the live data about voltage,current,power or curve. Contact Sungrow serviceto enable live data function of devices.

What to do if a Sungrow inverter is not working?

e fault still exists,contact SUNGROW.PV input configuration 047 abnormal,PV input mode rror Stop and disconnect the inverterthe PV array.048-050053-056059-060Device anomaly Wai for the inverter to return to normal.Disconnect the AC and DC switches,and reconnect the AC and DC switches 15 minutes later to restart the inverter.If t

What is a Sungrow sg20rt solar inverter?

The Sungrow SG20RT is a solar inverter that converts DC power into AC power,allowing it to be used in commercial and residential solar power systems. This inverter has not been categorized into a specific classification by the manufacturer. It has a maximum DC input voltage of 1500 V and a rated power output of 20 kW.

What is included in a sungrowpower manual?

The manual mainly describes the product information,guidelines for installation,operation and maintenance. The manual cannot include complete information about the photovoltaic (PV) system. The reader can get additional information about other devices at [www. sungrowpower. com](http://www.sungrowpower.com) or on the webpage of the respective component manufacturer.
