

Who is sunwoda electric vehicle battery?

Sunwoda Electric Vehicle Battery Co.,Ltd. is a wholly-owned subsidiary of Sunwoda Electronic Co.,Ltd.(stock code: 300207). Sunwoda is committed to providing electric vehicle battery pack solutions for new energy vehicle companies in China and the world through advanced lithium battery integration technology.

How much will sunwoda invest in a new electric vehicle battery plant?

Sunwoda will invest about 3 billion euros in the new electric vehicle battery plant to produce cells, modules, packs and complete battery systems for vehicles and stationary energy storage systems. Construction will take place in two phases with an initial annual capacity of 30 GWh and a further 20 GWh at a later date.

Who is sunwoda?

Sunwoda is committed to providing electric vehicle battery pack solutions for new energy vehicle companies in China and the world through advanced lithium battery integration technology. Sunwoda has established complete R&D and manufacturing capabilities in the field of electric vehicle battery packs.

Where are sunwoda batteries made?

The company's other battery factories, with annual capacities of 30 GWh and 20 GWh, respectively, are reportedly being built in Zhuhai (Guangdong province) and Shifang (Sichuan province). As indicated by CN EV Post, Sunwoda has announced 14 investments since March 2021, totalling 110 billion yuan (15.7 billion euros).

What makes sunwoda a good battery company?

Sunwoda has established complete R&D and manufacturing capabilities in the field of electric vehicle battery packs. It has a battery management system (BMS) with completely independent intellectual property rights, highly automated cell sorting, modular assembly, and battery packaging with fully automated production lines.

Does sunwoda have a supercharging battery?

In April, Sunwoda launched a supercharging battery that can keep an NEV running 1,000 kilometers (621 miles) and be recharged from 20% to 80% in 10 minutes, according to the January article. Related: China Firms Push Envelope of Battery Technology
