

How do I charge my 26800mah power bank?

The solar charger will achieve better results when charged and discharged 3 times or more. Before charging your device, please make sure the output port voltage matches the input voltage of your device. You can fully recharge your 26800mAh power bank within 7-8 hours via 5V/3.0A USB port.

What is a 3A power bank?

3A (max) outputs let you 2.5X fast power up your devices. Get your recharge covered by providing both USB inputs and sunlight. Serves as not only an on-the-go charger but a handy flashlight in the dark. It is highly recommended that the power bank should be fully charged via outlet before first use.

How long does it take to charge a power bank?

2.5X Recharging: You can fully charge your power bank in 7 hours with a USB C charger (not Included), which is 2.5 times faster than 1A input. The USB C port also can work as output to charge your phone. Outdoor Essentials: Equipped with solar panel, just hang it on your backpack to get recharge via sunlight.

How often should a solar power bank be charged?

It is highly recommended that the power bank should be fully charged via outlet before first use. If not used frequently, the product needs to be recharged every 3 months. The solar charger will achieve better results when charged and discharged 3 times or more.
