

# Target san diego electric car charging station

Where can I charge my electric car in San Diego?

In San Diego, many touristic sites can be accessed with an electric vehicle, as level 2 charging stations and level 3 charging stations are located within 10 miles of the city. Use ChargeHub's charging station map to find stations offered by Tesla, Greenlots, Blink, EVgo and many more (available for iOS and Android).

Does target have charging stations?

Target, as a brand, does incorporate charging stations at many, but not all of its stores-- yet. Over the last several years, Target has partnered with Electrify America, Chargepoint, and Tesla to bring both Level 2 and Level 3 (the super fast type) charging options to more and more locations at a rapid rate.

How many charging stations are there in San Diego?

There are 1420 public charging station ports (Level 2 and Level 3) in San Diego, California, United States. 89% of the ports are level 2 charging ports and 15% of the ports offer free charges for electric cars.

Where can I get a free charge at Target?

Generally, you can expect to find free Level 2 charging stations at participating Target stores which will add 20 miles of driving distance per hour of charging. Tesla, Electrify America, and Chargepoint may also offer Level 3 fast charging by the minute or by the kilowatt-hour, depending on your state.

Can San Diego's touristic sites be accessed with an electric vehicle?

Many of San Diego's touristic sites can be accessed using an electric vehicle, as level 2 charging stations and level 3 charging stations are located within 10 miles of the city. This is interesting for the EV community, as the conducted research aims to alleviate site host charges and provide services to the charging infrastructure.

Does target offer free EV charging?

Generally, select Target stores offer free electric vehicle charging for up to 2 hours and charge a fee beyond that (typically \$2 dollars per hour). The free charging offered is at Level 2 speeds and is generally around 7kW per hour. This will provide the typical EV with 20 miles of driving range per hour of charge time.
