

What is Tesla Solar?

Tesla Solar is a system that makes it easy to produce clean, renewable energy for your home or business and to take control of your energy use. Learn more about solar.

What can you power with Tesla Solar Panels?

Generate your own clean energy whenever the sun is shining with Tesla solar panels. Power everything from your TV to the internet with solar energy. Save excess solar energy in Powerwall for use during storms and outages, or when utility prices are high.

What does Tesla Solar help you control?

Tesla solar makes it easy to produce clean, renewable energy for your home or business and to take control of your energy use. Learn more about solar.

What is Tesla's best solar product?

Tesla's Powerwall battery is the company's best solar product. The Powerwall is charged by excess energy produced by the solar panels or solar roof and is discharged when solar energy isn't being generated. The Tesla Solar Roof is your roof -- instead of shingles, you'll have roofing tiles that produce solar energy.

Who makes Tesla Solar panels?

Tesla panels were manufactured by Panasonic until 2020, but the company now works with various suppliers, including Qcells. Regardless of the supplier or installer, Tesla covers its solar panels with a 25-year equipment and performance warranty. We recommend Tesla if you're looking for an affordable solar panel system with a long 25-year warranty.

What is a Tesla Powerwall & how does it work?

If you want to add energy storage to your home solar system, the Tesla Powerwall is one of the most advanced home batteries on the market. Tesla also installs solar roofs with built-in photovoltaic (PV) solar cells, offering a more aesthetically pleasing alternative to traditional panels.
