

Can a Tesla Solar Roof power a home?

Yes, a Tesla Solar Roof can power a home. It's a fully integrated solar and energy storage system. The glass solar tiles and steel roofing tiles not only look great but also generate electricity to power your home.

What is Tesla's Solar Roof and how does it work?

Solar Roof is a solar panel system that combines glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while steel tiles add longevity and corrosion resistance to your roof. It stores the energy produced so you can power your home anytime, even at night or during an outage.

What can a Tesla solar roof be made of?

The Tesla Solar Roof is made of glass solar tiles and steel roofing tiles. It can power your home with a fully integrated solar and energy storage system, and it looks great up close and from the street, complementing your home's natural styling.

Is it worth buying a Tesla Solar Roof?

"I would definitely recommend the Solar Roof," says Tomas Nochta, who lives in Saddle Brook, New Jersey, and has a 1,175-square-foot roof with enough sunlight-harvesting tiles to generate 7.6 kilowatts of power -- enough to power his home.

Can a Tesla Solar Roof be used with a Powerwall?

Yes, you can combine your Solar Roof with Powerwall. Powerwall is a home battery featuring an integrated solar inverter for increased efficiency and dependable energy storage 24/7. With the Tesla app, you can monitor your energy production in real time and control your system from anywhere.

How many solar roofs does Tesla install?

Our in-house team of energy professionals has installed nearly 4.0 GW of solar across approximately 480,000 roofs. From design to power on, we take care of everything. Cumulatively, these installations have generated over 25.0 TWhs of clean energy. Chat with a Tesla Advisor to ask any questions about Solar Roof.
