

Is Tesla launching a virtual power plant in Puerto Rico?

The company's California virtual power plant has already proved successful in its first year. Tesla recently launched a new one in Texas that looks to be quite profitable for Powerwall owners. Earlier this summer, we reported that Tesla got the greenlight to launch one in Puerto Rico.

Why is Tesla launching a VPP in Puerto Rico?

This one is very exciting because Puerto Rico badly needs a more stable grid and Tesla's VPP could quickly become useful as the automaker already has a large fleet of Powerwalls in the region. Today, Tesla announced that the Puerto Rico VPP has officially launched in partnership with Sunova and Sunrun:

Will Tesla launch a Powerwall in Puerto Rico?

Earlier this summer, we reported that Tesla got the greenlight to launch one in Puerto Rico. This one is very exciting because Puerto Rico badly needs a more stable grid and Tesla's VPP could quickly become useful as the automaker already has a large fleet of Powerwalls in the region.

Could Tesla become the world's largest virtual power plant?

Drew Baglino, Tesla's SVP of engineering, said that it could become the world's largest virtual power plant: Excited to be working alongside our partners, Sunova Energy and SunRun, and Powerwall customers to make this the biggest VPP in the world (potential over 300MW) and rapidly reduce the frequency and duration of grid outages in Puerto Rico.

What is solar power in Puerto Rico?

Solar power is a renewable energy source that has been booming in Puerto Rico since the hurricane. Across the island, individuals, communities, and businesses are installing solar panels and battery systems. At the Community Foundation of Puerto Rico, Javier Rivera is working on solar systems with 50 mostly rural, underserved communities.
