

Toughtested 16000 mah solar power bank

What is the best solar power bank?

Learn More. The ToughTested 16000mAh solar power bank is a great choice if you are looking for a way to keep your gadgets charged when outdoors or in case of an emergency. ToughTested 16000mAh holds enough power to charge a standard smartphone 5-6 times.

How many times can a solar power bank recharge a smartphone?

Never run out of power again with the 16,000mAh Solar Power Bank from ToughTested. This portable battery pack features a built-in solar panel and is IP67 rated to be dustproof, shockproof, and waterproof. With a 16,000 mAh capacity, it can fully recharge most smartphones five to six times.

Is a 10000 mAh power bank good?

A power bank with a capacity of 10000 mAh or more is considered decent. However, if you need a power supply that can last for 3-4 days, a power bank with a capacity of 20000 mAh or more would be a better choice.

How do you charge a power bank?

When the battery dies down, just leave the power bank in the sun and it recharges completely in around 5-6 hours. Unfortunately, there's no other way to charge the power bank. You can't plug it into a wall outlet or even charge it via USB from your laptop.

What does IP67 mean on a power bank?

The IP67 rating means the power bank is dust proof and waterproof. The manufacturer also says it's shockproof. So a fall in the snow or an accidental dunk in a pond shouldn't cause any issues. This makes it great for camping, hiking and other outdoor activities.
