

Tucson electric power residential solar program

Does Tucson have solar energy?

When it comes to solar energy, there's no place like home. Tucson averages more than 280 days of sunshine annually, making solar energy a great option for both homes and businesses. TEP offers several ways for customers to claim a share of our local clean energy resources.

How does TEP's GoSolar Home program work?

TEP's GoSolar Home program allows you to power your home with solar energy by signing up. The monthly energy rate you pay for solar power - based on your last 12 months of usage - can remain fixed for 10 years. With no maintenance costs and no rooftop installation required, it's an easy and affordable way to go solar with TEP.

How long does it take to install a solar system in Tucson?

It takes between 2 to 4 weeks to get a solar system up and running with TEP. TEP requires solar customers to use Time of Use rates, which may lower solar savings a bit. How much does a solar system cost in Tucson with TEP? Most homeowners will pay around \$2.60 per watt of solar installed.

Does TEP have a GoSolar home program?

TEP's GoSolar Home program allows you to get your electricity from one of TEP's solar facilities for a fixed energy rate for 10 years. This is different from GoSolar Shares.

Does TEP have a community solar program?

Yes, TEP offers two community solar programs for their customers who cannot install solar on their roofs. When you go to TEP's website and try to find information about going solar, these are the programs they promote the most.

Is Arizona a good place to convert solar energy?

Arizona is one of the world's sunniest places, making our state an ideal location to convert energy from the sun into electricity. TEP has partnered with CleanPower Research to offer Solar Analysis, a service that helps you compare various solar options.

Just sign up for the TEP GoSolar Home program and power your home with solar energy. The monthly energy rate you pay for solar power - based on your last 12 months of usage - can remain fixed for 10 years. All with no ...

Tucson Electric Power's (TEP's) Residential Solar Program will launch in Spring 2015 to 500-600 customers. TEP will install solar photovoltaic (PV) panels on the customer's rooftop, and will retain ownership, operation, and maintenance of the system. TEP has contracted with three local solar companies to install and maintain the systems.

Tucson electric power residential solar program

REC Group, a leading global provider of solar energy solutions, has signed an agreement with Tucson Electric Power (TEP) as the exclusive solar panel supplier for the utility's TEP Residential Solar Program. The agreement marks the first time that the new REC TwinPeak Series product line has been selected for a major rooftop project.
