

Is solar energy a good option in Tucson?

Tucson averages more than 280 days of sunshine annually, making solar energy a great option for both homes and businesses. TEP offers several ways for customers to claim a share of our local clean energy resources. We're also happy to provide information and support for customers who want private solar arrays.

Does Tucson have a solar power system?

TUCSON, Ariz.-- (BUSINESS WIRE)--With Tucson's newest and largest solar power system now online, Tucson Electric Power (TEP) can deliver more solar energy than ever before - including when the sun isn't shining. "Storage makes solar power even more valuable by helping us provide clean, renewable energy when customers need it most"

How do I buy solar power in Arizona?

Purchase some or all of your power from local TEP solar arrays on a flexible, month-to-month basis. Buy solar power in "shares" of 150 kilowatt-hours (kWh) per month for about 1 cent per kWh. Arizona is one of the world's sunniest places, making our state an ideal location to convert energy from the sun into electricity.

How long does it take to install a solar system in Tucson?

It takes between 2 to 4 weeks to get a solar system up and running with TEP. TEP requires solar customers to use Time of Use rates, which may lower solar savings a bit. How much does a solar system cost in Tucson with TEP? Most homeowners will pay around \$2.60 per watt of solar installed.

Can solar panels be installed in Arizona?

Solar panel installation on your building. Photovoltaic (PV) panels convert energy from the sun into electricity. Arizona is an ideal location to install solar systems since we receive a relatively high amount of annual sunshine. Is solar generation right for me?
