

Types of charging stations for electric cars

What are the different types of EV charging stations?

Currently, there are three types of public charging stations, creatively named Level 1, Level 2, and Level 3. Level 1 charging provides the same amount of electricity as your typical household 120-volt outlet--that is, not much. Modern EVs charge at a glacially slow pace using this method. In fact, many describe Level 1 as trickle charging.

How to find a charging station for an electric car? How To Charge An Electric Car: EV Charging Explained - DrivingElectricityyoutube.com What type of charging station should I use?

As mentioned earlier, the type of charging station also plays a role. Level 1 charging is the slowest and most budget-friendly option, utilizing a standard 120-volt household outlet. Level 2 charging speeds things up with a 240-volt outlet but can be a bit costlier to set up.

Which EV charging station is best?

Chargefox is currently the only provider of Level 2 AC EV charging and the cost can be found in the Chargefox app. Level 3 Charging Stations: Level 3 charging stations, also known as DC Fast Charging (DCFC) stations, have the fastest charging rates for EVs, with a charging rate of up to 50 kW.
