

Typical usb car charger sold in gas stations

What can you charge with a USB car charger?

USB car chargers allow us to power up our smartphones, tablets, and a multitude of other USB-powered devices while we drive. These nifty gadgets have emerged as a simple solution, transforming the cigarette lighter socket in our vehicles into a convenient charging station.

How many watts can a USB car charger handle?

Port one: USB-C 30W | Port two: USB-A 18W | Max combined: 48W With build quality sorted, USB-A and USB-C ports with fast charging on offer, this is the USB car charger that covers all important bases. You can fast charge with both ports up to a combined total of 48W. The USB-C port can handle up to 30W, which can be used for laptops.

How does a USB car charger function?

A USB car charger uses two standard USB-A ports to power up your devices. It sits flush with the car's outlet and has integrated lighting for each port, making them easy to find in the dark.

What makes this USB car charger a good choice?

This USB car charger is a good choice because it offers dual fast-charging ports, power, warranty and price point. It also includes a USB-A port for older charging cables and is made by a reliable brand, Anker.

How do you charge a car stereo with a cigarette lighter?

Use a Car USB Charger - Simply plug it into the cigarette lighter socket to enable USB charging. Install a Wireless Car Charger - Some wireless chargers also feature USB ports for additional charging options. Upgrade to a Head Unit with USB Ports - Some modern car stereo systems come equipped with built-in USB charging ports.

How well does USB charging work in a car?

The effectiveness of charging devices in a car depends on the power output of the USB port. Most built-in car USB ports offer lower amperage, typically around 0.5 to 1.5 amps, which can result in slow charging.
