

What is Vistra Energy's Upton 2 solar power plant?

Vistra Energy's Upton 2 Solar Power Plant, located in West Texas, has achieved commercial operations and is now Texas' largest operating solar facility, with a capacity of 180 megawatts.

Who owns Upton 2 Solar Power Plant?

Upton 2 Solar Power Plant, with a capacity of 180 megawatts, is Texas' largest operating solar facility. Luminant, the power generating subsidiary of the company, is the plant's owner and serves as its qualified scheduling entity with the Electric Reliability Council of Texas (ERCOT). Vistra announced the purchase of Upton 2 in May 2017 while the project was under development.

When will Upton 2 solar farm be built?

Construction began in February 2019, with the first, 252-MW phase coming online in December 2019 and the project reaching completion last September. The Upton 2 Solar Farm is the second-largest solar power plant in the state, comprising 718,000 solar panels and generating enough power to supply approximately 56,700 households.

What happened to Luminant's Upton 2 battery energy storage system?

On Dec. 31, 2018, Luminant, a subsidiary of Vistra Energy (NYSE: VST), announced that its Upton 2 battery energy storage system project finished construction and began operating.

Why did Vistra decide to buy Upton 2?

Vistra announced the purchase of Upton 2 in May 2017 while the project was under development. Vistra saw Upton 2 as a perfect fit for its integrated business model. When we announced the project a year ago, we did so knowing that Upton 2 was the perfect fit for Vistra's integrated business model,

Vistra Energy (NYSE: VST) today (6/1) announced that its Upton 2 Solar Power Plant in West Texas has achieved commercial operations. At 180 megawatts, Upton 2 is Texas' largest ...

Vistra Energy announced its Upton 2 Solar Power Plant in West Texas has achieved commercial operations. At 180 MW, Upton 2 is one of Texas' largest operating solar ...

Upton 2 solar power plant sits on nearly 1,900 acres, roughly the equivalent of 1,424 football fields. It consists of 718,000 photovoltaic solar panels. The power plant capacity ...

The Upton 2 Solar Farm was the largest solar power plant in Texas prior to the Roadrunner Solar Farm (mentioned above). The solar farm covers nearly 1,900 acres -- roughly the equivalent of 1,424 football fields! 718,000 ...

Luminant's Upton 2 Battery Storage Project Awarded Million-Dollar Grant from the State of Texas

10.30.2018; Luminant to Close 51-Megawatt Power Facility in PJM Electric Market 08.24.2018; Vistra Energy to Develop 300-Megawatt Battery ...

Vistra Energy announced its Upton 2 Solar Power Plant in West Texas has achieved commercial operations. At 180 MW, Upton 2 is one of Texas" largest

Utility-scale solar project located in Upton County, Texas. 180 MW of installed capacity. The Upton 2 solar facility is the largest by capacity in Texas. Capacity to power approximately ...

The battery system, which is the largest energy storage project in Texas and seventh largest in the United States, is located on the site of Luminant"s 180-megawatt Upton 2 Solar Power Plant in ...

The Upton 2 Solar Farm is the second-largest solar power plant in the state, comprising 718,000 solar panels and generating enough power to supply approximately 56,700 households. The facility includes a 10-MW/42

...

Upton 2 solar power plant sits on nearly 1,900 acres, roughly the equivalent of 1,424 football fields. It consists of 718,000 photovoltaic solar panels. The power plant capacity of 180 MW is enough to power approximately

...

The battery system, which is the largest energy storage project in Texas and seventh largest in the United States, is located on the site of Luminant"s 180-megawatt Upton ...

Claimed to be the largest operating solar facility in Texas, Upton 2 power plant is located on nearly 1,900 acres of land. It consists of 718,000 PV solar panels and can cater to the power ...

Upton 2 Solar Power Plant Facts. Sits on nearly 1,900 acres, roughly the equivalent of 1,424 football fields. Consists of 718,000 photovoltaic solar panels.

Roadrunner solar farm is installed with more than 1.2 million bifacial solar modules based on solar photovoltaic technology. The bifacial solar modules can double production by using captured reflections from the ground to ...

Comanche Peak Nuclear Power Plant (2,300 MW) Upton 2 Solar (180 MW) and Energy Storage Facility (10 MW/42 MWh) Moss Landing Energy Storage Facility (400 MW/1,600 MWh) - 300 MW Phase I expected online ...

The Upton 2 battery system is located on the site of Luminant"s 180MW Upton 2 Solar Power Plant in Upton County, Texas. The company claims that the battery system is the largest energy storage project in Texas and

...

Vistra Energy, headquartered in Irving, Texas, has awarded a contract to FlexGen to design and integrate a 10-MW/42-MWh FlexGen energy storage system (ESS) at Upton 2 Solar Power ...

The company said in a statement that this 180 MW plant is Texas" largest operating solar facility. Integrated power company Vistra Energy has successfully commenced commercial operations ...

At 180 megawatts, Upton 2 is Texas" largest operating solar facility. The company"s power generating subsidiary, Luminant, is the plant"s owner and serves as its qualified scheduling ...

The Upton 2 battery system is located on the site of Luminant"s 180MW Upton 2 Solar Power Plant in Upton County, Texas. The company claims that the battery system is the ...
