

How much power does a USB car charger provide?

This USB car charger offers 2.4 amps of current through its USB-A port, without quick charging. For full performance, use a USB-C cable and the Type C port, which puts out up to 45 watts of power.

How does a USB car charger function?

A USB car charger uses two standard USB-A ports to power up your devices. It sits flush with the car's outlet and has integrated lighting for each port, making them easy to find in the dark.

Can You charge a car battery with a USB charger?

While your car is running, there is no problem because the alternator is charging the car battery. A USB charger will draw a little power from a car's battery but not anything significant. With electric cars, it's a similar story, though you need to remember any power drain is being taken directly from the batteries that fuel the car.

How can I choose a fast USB car charger?

To choose a fast USB car charger, look for ones that are Qualcomm Quick Charge 3.0 certified, also called Power Delivery (PD). These chargers provide a guaranteed 36 watts to compatible devices and deliver the fastest speed.

What makes this USB car charger a good choice?

This USB car charger is a good choice because it offers dual fast-charging ports, power, warranty and price point. It also includes a USB-A port for older charging cables and is made by a reliable brand, Anker.

Can you use a USB charger when a car is off?

You may not even be able to use the USB charger when a car is off, depending on the model. Some cars continue to supply power to the 12V when off, some don't. A car battery still has to power things when off, so it's best not to add any extra drain while a car is off.
