

Who can subscribe to Versant power solar energy?

Anyone within Versant Maine Public District can subscribe to the 2 megawatts of solar energy being built. That's enough renewable energy to power 250 homes. Together we are working with Versant Power to provide cheaper energy solutions to northern Maine residents.

Does Versant Power provide electricity?

Versant Power provides electricity to customers within its service area. If customers don't choose an energy supplier, they will receive the standard-offer service, which is available through the Maine Public Utilities Commission. Versant Power currently has nearly 160,000 customer accounts and offers various electricity rates under different plans.

What are energy suppliers in Versant power's service area?

Because customers in Versant Power's service areas are deregulated, they can shop around for competitive pricing options from energy suppliers that serve Versant Power's service area. Energy suppliers provide an alternate source for customers who want to purchase services from another source.

How much energy does a community solar garden produce?

The Novel Energy Community Solar Garden will produce the energy equivalent of 843,364 gallons of gas consumed, 412 tons of coal burned, or 250 homes of energy used per year. Apply today and join your neighbors with clean energy. Membership is Currently OPEN for a limited time.
