

Does Virginia offer solar incentives?

Virginia offers three solar incentives to residents who install solar: a property tax exemption, Solar Renewable Energy Certificates (SRECs), and net metering. These incentives can be combined with the 30% federal solar tax credit to further decrease the cost of going solar.

Does Virginia offer a tax credit for solar energy?

Virginia offers two primary incentive programs for solar energy. You can combine both with the nationwide federal tax credit. The programs are: The Virginia SAVES Green Community Program offers low-interest financing for energy efficiency, renewable energy and electric vehicle charging projects. Unfortunately, homeowners cannot apply directly.

Are solar panels tax deductible in Virginia?

Virginia has a property tax exemption for the value added to your home by solar panels to help you save money, though. You can also take advantage of the federal solar investment tax credit (ITC) and Solar Renewable Energy Certificate (SREC) program to make solar more affordable for residents.

Does Virginia have a solar tax exemption?

Availability varies by location. While some states have very few solar incentives, Virginia has quite a few that can benefit residents and businesses. The Residential Property Tax Exemption for Solar gives counties and cities the option to disregard the value added by solar when determining property taxes.

Does Virginia have a solar rebate?

While Virginia does not have a dedicated state rebate for solar panel installation, some manufacturers like LG offer their own solar rebates. These programs are usually time sensitive. For example, LG offers a \$600 solar rebate on their equipment, which your installer can help you redeem over the next year.

What is the federal solar tax credit?

If you install your photovoltaic system before the end of 2032, the federal tax credit is 30% of the cost of your solar panel system. This is 30% off the entire cost of the system including equipment, labor, and permitting. Example: If your solar energy system costs \$20,000, your federal solar tax credit would be  $\$20,000 \times 30\% = \$6,000$ .
