

Which solar power bank is the best?

The Solgaard Solarbank is our top pick due to its high value. It's light, durable, charges quickly, and stores up to 5 full phone charges. However, if you need a larger battery capacity, consider other options as well.

Why should you get a solar power bank?

Having a solar power bank means being able to charge all your electronics anywhere, any time. Say good-bye to dead mobile phones during travel or extended periods away from an outlet. No more dying tablets, phones, or other small devices. Sunlight is all you need to charge your gear on the go. Talk about peace of mind!

How many charges can the solar power bank hold?

The solar power bank holds up to five charges, ensuring you won't end up with any dead devices, no matter where you are. Its solar panels let you charge it up with some sunlight or with a USB-C chord - whichever option is most convenient. There's a good reason it's considered the top solar power bank on the market.

Can a solar panel be used to charge a power bank?

If you're looking to use solar power for your power bank, a smart option is to purchase a separate solar panel. You can then use the solar panel to charge your power bank and also use it as shade to help extend its battery life.

How can a solar panel help extend a power bank's battery life?

You can use the solar panel itself as shade for your power bank as it charges, helping to extend its battery life. But if you're really intent on having backup solar for your power bank, then a smart option is to purchase a separate solar panel to pair with your power bank.

What makes solar power banks appealing?

Solar power banks are appealing because they offer the best of both worlds, and at such a low cost. Power stations and solar panels are rapidly taking over the energy landscape, from electric cars to energy-independent, single-family homes.
