

Does Vivint Energy offer solar battery options?

Vivint Energy offers several Solar Battery options that will ensure you're protected from Outages. For a quote, call (855) 224-6995.

What financing options does Vivint offer?

Vivint offers three simple financing options for solar batteries and solar back-up batteries: Solar PPA/Lease: Pay a fixed rate per kWh, Solar Loan: Purchase and finance your system, Solar Cash Purchase: Own your system outright. Discover power independence with a plan that works for you.

What happens if a solar panel loses power?

If your panel loses power due to being unplugged or a home power outage, the backup battery will keep your system running. However, you may receive a panel low battery alert if your panel goes without power for too long. You can acknowledge the alert to stop the panel from beeping. The battery will recharge once power is restored.

Can a solar generator run during a blackout?

During a blackout, a solar generator can provide power by charging its batteries during the day and discharging them at night. As long as you have enough battery capacity, you could keep running like this through a very long power outage.

What happens to a solar-plus-battery system during a power outage?

Unlike solar without batteries, a solar-plus-battery installation keeps your power on by "islanding," or disconnecting itself from the grid when an outage is detected. While the blackout remains in effect, your little solar island will charge the batteries during the day and discharge them at night.

Can a Vivint Home help save money?

A Vivint home can help you save money by combining energy-savings with award-winning protection for total peace of mind. See how much you could save by switching to Smart Energy from Vivint and bundling with a smart home security system. We'll tell you what solar energy is, how it works, and list some of the potential cost savings you might see from installing a solar energy system.

Homeowners can use the battery packs to store solar energy in order to use at night or when grid rates are higher, or they can also use the system for backup energy in case of a power outage.
