

What is the Waka Waka Solar Power Charger Light?

The Waka Waka Solar Power Charger Light is a solar-powered device that can fully charge a smartphone after about 12 hours in the sun. It also has twin LED flashlights that can be powered by the solar energy.

What is WakaWaka Power+?

The WakaWaka Power+ is a powerful, compact solar power bank and flashlight for every outdoor situation. Going to a festival, camping, or picnicking? Have the power you need to share your stories with your friends, use your action cam, play music, or just light up the night sky. All with free energy from the sun.

How does the Waka Waka Power device charge?

The Waka Waka Power device charges by putting it in the sunlight. A tiny flashing indicator light on top shows the charging status - a series of single flashes indicate a slow charge, two flashes indicate a normal charge, and three mean that it's charging fast.

Can Waka Waka charge a smartphone?

Waka Waka can fully charge a smartphone and still have enough juice left over for extra power down the line. And as long as you have access to the sun, you'll be able to replenish your Waka Waka and your phone as needed. This security lets you relax and enjoy your travels. A smart way to charge your smartphone.

How long does it take to charge a Waka Waka Power?

It takes four hours to charge a Waka Waka Power from a computer's USB port. Once it's charged, you can then charge a phone or other device via the Waka Waka's USB port.

Is Waka Waka a good flashlight?

Waka Waka's large, easy-to-find power button and four brightness levels make it a must-have during your (literal) darkest hours. Use the flashlight's lowest level when you just need a little light to play cards by or use the ultra-bright level when you need to hunt for a dropped tent stake.

The idea behind Waka Waka Power is simple. You put it in the sunlight, and it automatically starts charging up its 2,200 mAh LiPo battery. A tiny flashing indicator light on ...
