Are solar-powered watches eco-friendly?

Solar-powered watches are some of the latest rages in the watch market. They are eco-friendly, come from reputable watchmakers, and offer the utmost convenience. But for those who've never owned a solar watch, there are still quite a lot of questions that need answers.

What is a solar watch?

But first off, what exactly is a solar watch? A solar watch is a timepiece that uses light energy to power its movement. The watch has a small solar panel on the face that absorbs sunlight and artificial light and converts it into electrical energy. As a result, this energy is used to power the watch movement and keep it running.

The watch is solar-powered and will run for about 7 months on a single charge, with typical daily use and 18 months in total darkness in "low power mode". It offers time, date, 38 timezones, an alarm, a battery level indicator, ...
