

Which cars have access to tesla charging stations

How many EVS will have access to the Tesla Supercharger network?

This means that virtually every single EV user will have access to about 2,000 charging stations nationally, and over 12,000 charging ports at these stations. Here's what we know about all other EVs that will have access to the Tesla Supercharger network in the year of 2024.

Does Tesla have a supercharger network?

Here's how we got here. In a major win for EV drivers, Tesla is opening up its Supercharger network to all non-Tesla EVs. So far, ten brands can power up at select stations: Ford, Rivian, General Motors (GM), Polestar, Volvo, Nissan, Lucid, Mercedes-Benz, and--as of this week--Hyundai and Genesis.

When will Lexus EVs have access to Tesla's Supercharger network?

Starting in 2025, electric Lexus models will come standard with a NACS charge port, which is Tesla's proprietary plug. This means the brand's EVs will have access to the nationwide Supercharger network.

Can a Tesla EV charge a car with a CCS port?

Existing EVs with the CCS-type port will be compatible with Tesla's supercharger network through an adapter.

Will a Ford EV use Tesla's Supercharger network?

Starting in the spring of 2024, Ford EV owners will have access to the Tesla Supercharger network. This includes models like the F-150 Lightning and Mustang Mach-E, which currently feature a CCS-type charge port but will use an adapter to connect to Tesla's fast-chargers.

Why does Ford only charge at Tesla stations?

Ford found that its drivers power up at Tesla stations only 20% of the time. Adapter availability, wait times, or charge port placement issues could be to blame. The cables that run from the Supercharger to the car are too short to reach the port on some non-Tesla vehicles, such as Fords.

Which Brands Can Access Tesla's Charging Network? As the end of 2024 rapidly approaches, and roughly a month after GM EV owners were finally given access to the Tesla Supercharger network, it seems like a good ...
