

# Which electric cars can use tesla charging stations

Can electric cars use a Tesla Supercharger?

Only electric cars fitted with a CCS-type plug can use a Tesla Supercharger, while Destination chargers use a standard Type 2 connector, which should be compatible with most electric cars. A CCS plug is a standard Euro-spec connector that combines two DC pins arranged below the Type 2 connector, allowing for fast charging.

Will Honda EVs be compatible with Tesla's charging network?

Honda has announced that it will introduce an adapter for its CCS-equipped EVs, making them compatible with Tesla's Supercharger network.

When will Lexus EVs have access to Tesla's Supercharger network?

Starting in 2025, electric Lexus models will come standard with a NACS charge port, which is Tesla's proprietary plug. This means the brand's EVs will have access to the nationwide Supercharger network.

Can a Tesla EV charge a car with a CCS port?

Existing EVs with the CCS-type port will be compatible with Tesla's supercharger network through an adapter.

Does Tesla have a supercharger network?

Here's how we got here. In a major win for EV drivers, Tesla is opening up its Supercharger network to all non-Tesla EVs. So far, ten brands can power up at select stations: Ford, Rivian, General Motors (GM), Polestar, Volvo, Nissan, Lucid, Mercedes-Benz, and--as of this week--Hyundai and Genesis.

When will electric Mini EVs be compatible with Tesla's Supercharger network?

As part of BMW's agreement to adopt Tesla's NACS charge port, new electric Mini models will be equipped with the plug starting in early 2025. In that same timeframe, existing Mini EVs with the CCS-type port will also be compatible with Tesla's supercharger network through an adapter.
