

# Who pays for public electric car charging stations

Do utility companies pay for EV charging stations?

Many utility companies throughout the U.S. offer rebate programs for commercial customers that install EV charging stations on their properties. Some of these programs, such as AEP Ohio's, offer to cover up to 100% of the costs. Your utility provider is the first place to check when you're weighing adding an EV charging station to your property.

Can I charge my electric car with cash?

Being used to charging at gas stations, you might expect to be able to pay by cash to charge your electric car. However, this is not the case in Europe, where it is rare to find charging stations accepting cash payments. Perhaps some providers will add such an option in the future, but it's unlikely.

How do I pay for an electric car?

You can pay at a charging station using a charging card, a mobile app, or directly with a credit/debit card. Some stations also support Plug & Charge or Autocharge, where payment is automatic once you plug in your car. The list below outlines the key payment options you have as an electric car driver.

Are EV charging stations free?

Free EV chargers tend to be the slower AC chargers. You are most likely to find free chargers in public car parks where the only cost will be the standard fee to park your car. Some free EV parking stations in the ACT have time limits of up to three hours, so always check before leaving your EV charging.

How much does EV charging cost?

Electric vehicle charging station costs vary depending on the location and supplier. You can typically expect to pay \$0.50/kWh to recharge your EV for fast DC charging. If you had a Nissan Leaf, it would cost \$20 to fully charge the car's 40kWh battery at a rate of \$0.50/kWh. You can pay for EV charging in a number of ways.

Are public charging stations free?

When using public charging stations to re-power your EV, some will be free to use, and some will be paid for. There are currently 11 rapid DC public chargers and 39 AC chargers in the ACT. DC chargers have rapid charging; you can expect your car battery to be fully replenished in an hour.
