

Why should electric cars get free charging stations

Should EV charging stations be free?

More EV charging stations would entice more drivers, which would help everyone. Different entities have different reasons for installing free charging stations. But they all make sense. And for someone without home charging, whatever these reasons are, they enable an EV life that probably wouldn't be practical without that effort.

Is free charging ruining the public EV charging experience?

It's ruining the public EV charging experience. Nearly every non-Tesla electric vehicle sold in the US today comes with some variation of a free charging offer than can be redeemed on a specific public EV charging network. The offers range from three years of free unlimited charging all the way down to two complimentary free charging sessions.

Is it possible to charge your car for free?

They also decided the best way to do that was to offer the charging for free. They have smart charging stations from ChargePoint that would allow them to start charging drivers at any time, but they've chosen till now to just keep it free (aka complimentary). And -- I'm sure it works!

Is it worth using free EV chargers?

Free charging is a big draw for many Electric Vehicle (EV) owners, but you may find that these chargers get busier than nearby chargers that require payment. In such cases, you can either wait (if there's space to do so) or you'll have to pay for a top-up.

Should electric vehicles have free unlimited charging?

Electric vehicle infrastructure already has enough challenges without free unlimited charging programs straining the networks further. There simply aren't nearly enough charging station sites and those in service don't have enough individual stations and quite often have broken chargers.

Can I charge my eV at home?

Many of the people occupying the DC fast charge plugs for long periods live within a few miles of the station and have the ability to charge their EVs at home, but they don't because they were offered free, unlimited charging when they purchased or leased the EV.
