

Worksp^{ort} s terravis solar truck bed power system

What is a Terravis solar tonneau cover system?

The TerraVis solar Tonneau cover system consists of four monocrystalline foldable solar panels that have an output of approximately 1,000 watts, or 1kW.

How does Terravis work?

The TerraVis system consists of four monocrystalline foldable solar panels that are tough enough to support the weight of a person walking on them. The panels feed a modular battery system mounted inside on the wall of the bed.

How much power does a Terravis provide?

The TerraVis has an output of approximately 5,000 watts and will be custom designed for use on conventionally-fueled pickup trucks for portable on-demand power. The system can be used on job sites and for remote adventure experiences where grid power isn't available. It can also be used to provide power during an outage or a natural disaster.

Can a Terravis be used as a tonneau cover?

Worksp^{ort}, a company known for its wide variety of tough and functional pickup truck tonneau covers, recently introduced the TerraVis, a solar-powered generator system that doubles as a tonneau cover.

How many batteries does a Terravis have?

The batteries are approximately 2 kWh each and the system can have up to 4 battery packs, plus the 1 kWh one that powers the portable charging pack that houses 110v AC power inverter. The TerraVis has an output of approximately 5,000 watts and will be custom designed for use on conventionally-fueled pickup trucks for portable on-demand power.

How much does Terravis cost?

The TerraVis system isn't available for purchase yet, and we don't have any estimated pricing, but Rossi promises us that it won't be prohibitively expensive. One reason is that since the system is modular, you don't have to buy the full arrangement of battery packs.

What is TerraVis. TerraVis is the first high-tech folding truck bed tonneau cover system to be a fusion of advanced storage, cutting edge solar power, and delivery. The new product utilizes the ...

Premium Positioning: With an anticipated Minimum Advertised Price (MAP) of \$1,099, the AL4 cover will be Worksp^{ort}'s most premium offering ahead of market launch of its ...

It works simple enough, too: It's basically a foldable pickup tonneau cover equipped with monocrystalline solar panels that store collected energy inside some cells and a removable power bank installed at the back of
