

What is X4 Foundations?

TRADE. FIGHT. BUILD. THINK. X4: Foundations is a Sci-Fi economic space simulation created and updated by the German company Egosoft. The game centers around a large and dynamic system of sectors, most of which are occupied and owned by one of a number of factions, each having their own goals and ambitions.

How much does a production station run off of 4 solar panels?

Currently I've got one station with 50+ production modules running off of 4 Solar Panels. Literally \$200M+ of production stations running off of what? \$12mil in solar panels. Seems a tad unbalanced.

Are solar plants a 'big first step' in building factories?

The term kinda grew on you as you played the game. But seriously do something for the Solar Plants. They were a 'big first step' in building factories. Now they're literally nothing... Is there a real E-Cell market in X4?

with no input requirement except building materials e cell locations wouldn't matter much at all unless maybe at below 40%, when spammign them might be annoying. Joined: Tue, 4. Dec 18, 23:56 by Shehriazad » Fri, 11. Jan 19, 11:00 RodentofDoom wrote: ? Thu, 10. Jan 19, 22:56 There is no real e-cell market in x4

How much would a X3 Crystal cost?

Were worth \$1600 a piece or so. (Which was high for X3, would be middle of the road for X4) Would make it less "free money" if they were implemented. Until of course you make a crystal factory! Maybe make them cost a solid \$2500+ with 15 years inflation. I must say the production chain was definitely more thought out in X3.

It looks to me that sunlight is still at 100% in all sectors. I tried a few different gamestarts in 1.5 and explored a some sectors, only to find uniform sunlight distribution in the ...

With the second most sunlight in the Jumpgate network Venus is a sector where highly efficient solar power plants can be built, although it is often just easier to build them in ...

Energy Cell Production is a production module that requires no other resource to create Energy Cells. The module looks like a solar panel array. It can be attaced to your HQ or stations that are built by the player. The blueprint is ...
